

UX PROCESS

Handing Over Details Specifications

UX PROCESS SIMPLIFIED
A course by : Muhamad Ahsan Pervaiz

Detailed Specs

Detailed specs of every task and functionality you are going to have in your app should be handed over to Developers

Work with a developer to create all these specs

These specs will have High-Fidelity Mockups or Wireframes, Interactive Prototypes and Task Inventory Diagram, Site Maps and User Flows

UX Design handoff Documents

- ✓ Functionality and Features (Boundary of Tasks)
- ✓ Flow of app/website (Navigation + Flows)
- ✓ Prototypes/ Task Interaction Models (Interactivity)
- ✓ Sitemap (Boundary + Structure of your app/website)
- ✓ Detailed Wireframes (Details of content on each page)

What else do we need?

For Websites, we will also need **sitemaps** along with **navigational hierarchy** of all the pages

Detailed list of all the features your product must have and also upcoming features you need to add in near future should be discussed with Development team

UX is a Collaborative Work

Few checkpoints to keep in mind

- Work with your Designers + Developers
- Involve CEO and Marketing in the process
- Refer back to User Interviews if needed
- Always test Prototypes before development
